

General Labware

Sun-SRI's line of general labware will optimize efficiencies in your laboratory, products include:

- Volumetric Flasks
- Calibrated Glass Pipets
- Transfer Pipets
- Culture Tubes
- GC Septa
- Optimize Technologies™ HPLC Replacement Parts—OPTI-MAX®, OPTI-SEAL®, OPTI-SOLV™ and OPTI-LYNX™
- UV Detector Kit
- Products for Capillary Electrophoresis
- Crimpers & Decrimpers
- Vial Racks and Storage

Chromseal™ 9001 High Performance GC Septa — High Temperature GC & Long Life GC Septa

Chromseal 9001 GC Septa are packed under strict quality control standards into chromatographically clean glass jars to protect them from contaminants, providing better, cleaner chromatography.

Chromseal 9001 High Temperature GC

Chromseal 9001 HT GC septa are designed to operate at true temperatures of 306°C. These red septa are available in appropriate diameters to fit a variety of gas chromatographs.

Chromseal 9001 Long Life GC Septa

Chromseal 9001 LL GC septa are designed to operate at a true temperature of 290°C. At the recommended temperature these septa offer a longer operational life. These blue septa are available in appropriate diameters to fit a variety of gas chromatographs.

UV Detector Performance Validation Kit

- Save costly technician calibration visits with this “do-it-yourself” kit to confirm detector precision, accuracy and linearity in less than 30 minutes
- NIST traceable standards meet GLP, USP and ASTM (1657-94 and 925-83) specifications
- Kit comes complete with UV detector connector, Microsoft® Excel and Lotus reporting template, syringes and certificate of NIST traceability

Kit Specifications

Each Wavelength and Absorbance kit contains the following:

- Eight Absorbance Solutions (potassium dichromate, between 0.01 and 0.02mg/mL, 30mL). Concentration certified to 4 significant figures
- One Wavelength Calibration Solution (4% holmium oxide in 10% perchloric acid solution, 30mL)
- One Absorbance Reference Solution (10% perchloric acid, 60mL)
- Eight 3mL Syringes and HPLC detector connection kit
- Microsoft Excel template disk
- Certificate of Analysis

Vial Racks

- Vial racks are great for storage and transportation of vials

Acrylic Dispensing Bins

- Transparent acrylic bins keep lab organized while storing supplies within arms reach
- Hinged covers keep stored items clean and free from contaminants
- Rubber feet are provided for stability on the bench
